

## Voices after internship

The whole internship was very well. I have learnt many things from this internship, such as the working environment and culture in Japan, people's attitude towards work and so on. What's more, the nice people there gave me a chance to know more about Japanese people. I think this internship really benefits me a lot from many ways.

Beside language barriers, I have no troubles during the internship.

It was a great and unforgettable experience that I have ever had in my life.

I like my life in Tono city. Everyone is really kind to me. Although I need to pay for my foods, many people treated me to a meal. Besides, I like the arrangement of changing my working place and living place every few days. Thanks to this arrangement, I can observe working atmosphere in different places and met a lot of people. I have learned a lot and had a great time during this internship. Thank you.

I think to do internship at Isumi city is very good experiences to me. Everyone is very kind to me and treats me well, they invite me to participate many events and to see many tourism attractions. In addition, we also do many culture exchanges not only in the city hall but also in persons.
